

WHAT IS MAPP.A ABOUT?

MAPP.A in an internet search service, in which materials and how-to-do tips for ESD can be easily found in one place.

MAPP.A database contains already almost 1000 materials, which have been produced by various organizations from the field of ESD. The amount of material increases continuously. The aim is that in the future MAPP.A will be the main ESD material distribution channel in Finland.

HOW DOES MAPP.A WORK?

MAPP.A is based on saving metadata (data about the containers of data) of material to the database. Metadata is saved with the simple form, which is easy to fill.

WHO BENEFITS FROM MAPP.A ?

MAPP.A benefit e.g. schools, nature and environmental school teachers and early childhood education by offering tools and support for planning lessons and programs. Also ESD material producers benefits, because they are free to add own material to MAPP.A. Service helps to bring good and high-quality materials more visible and more widely available

HOW WAS MAPP.A CREATED?

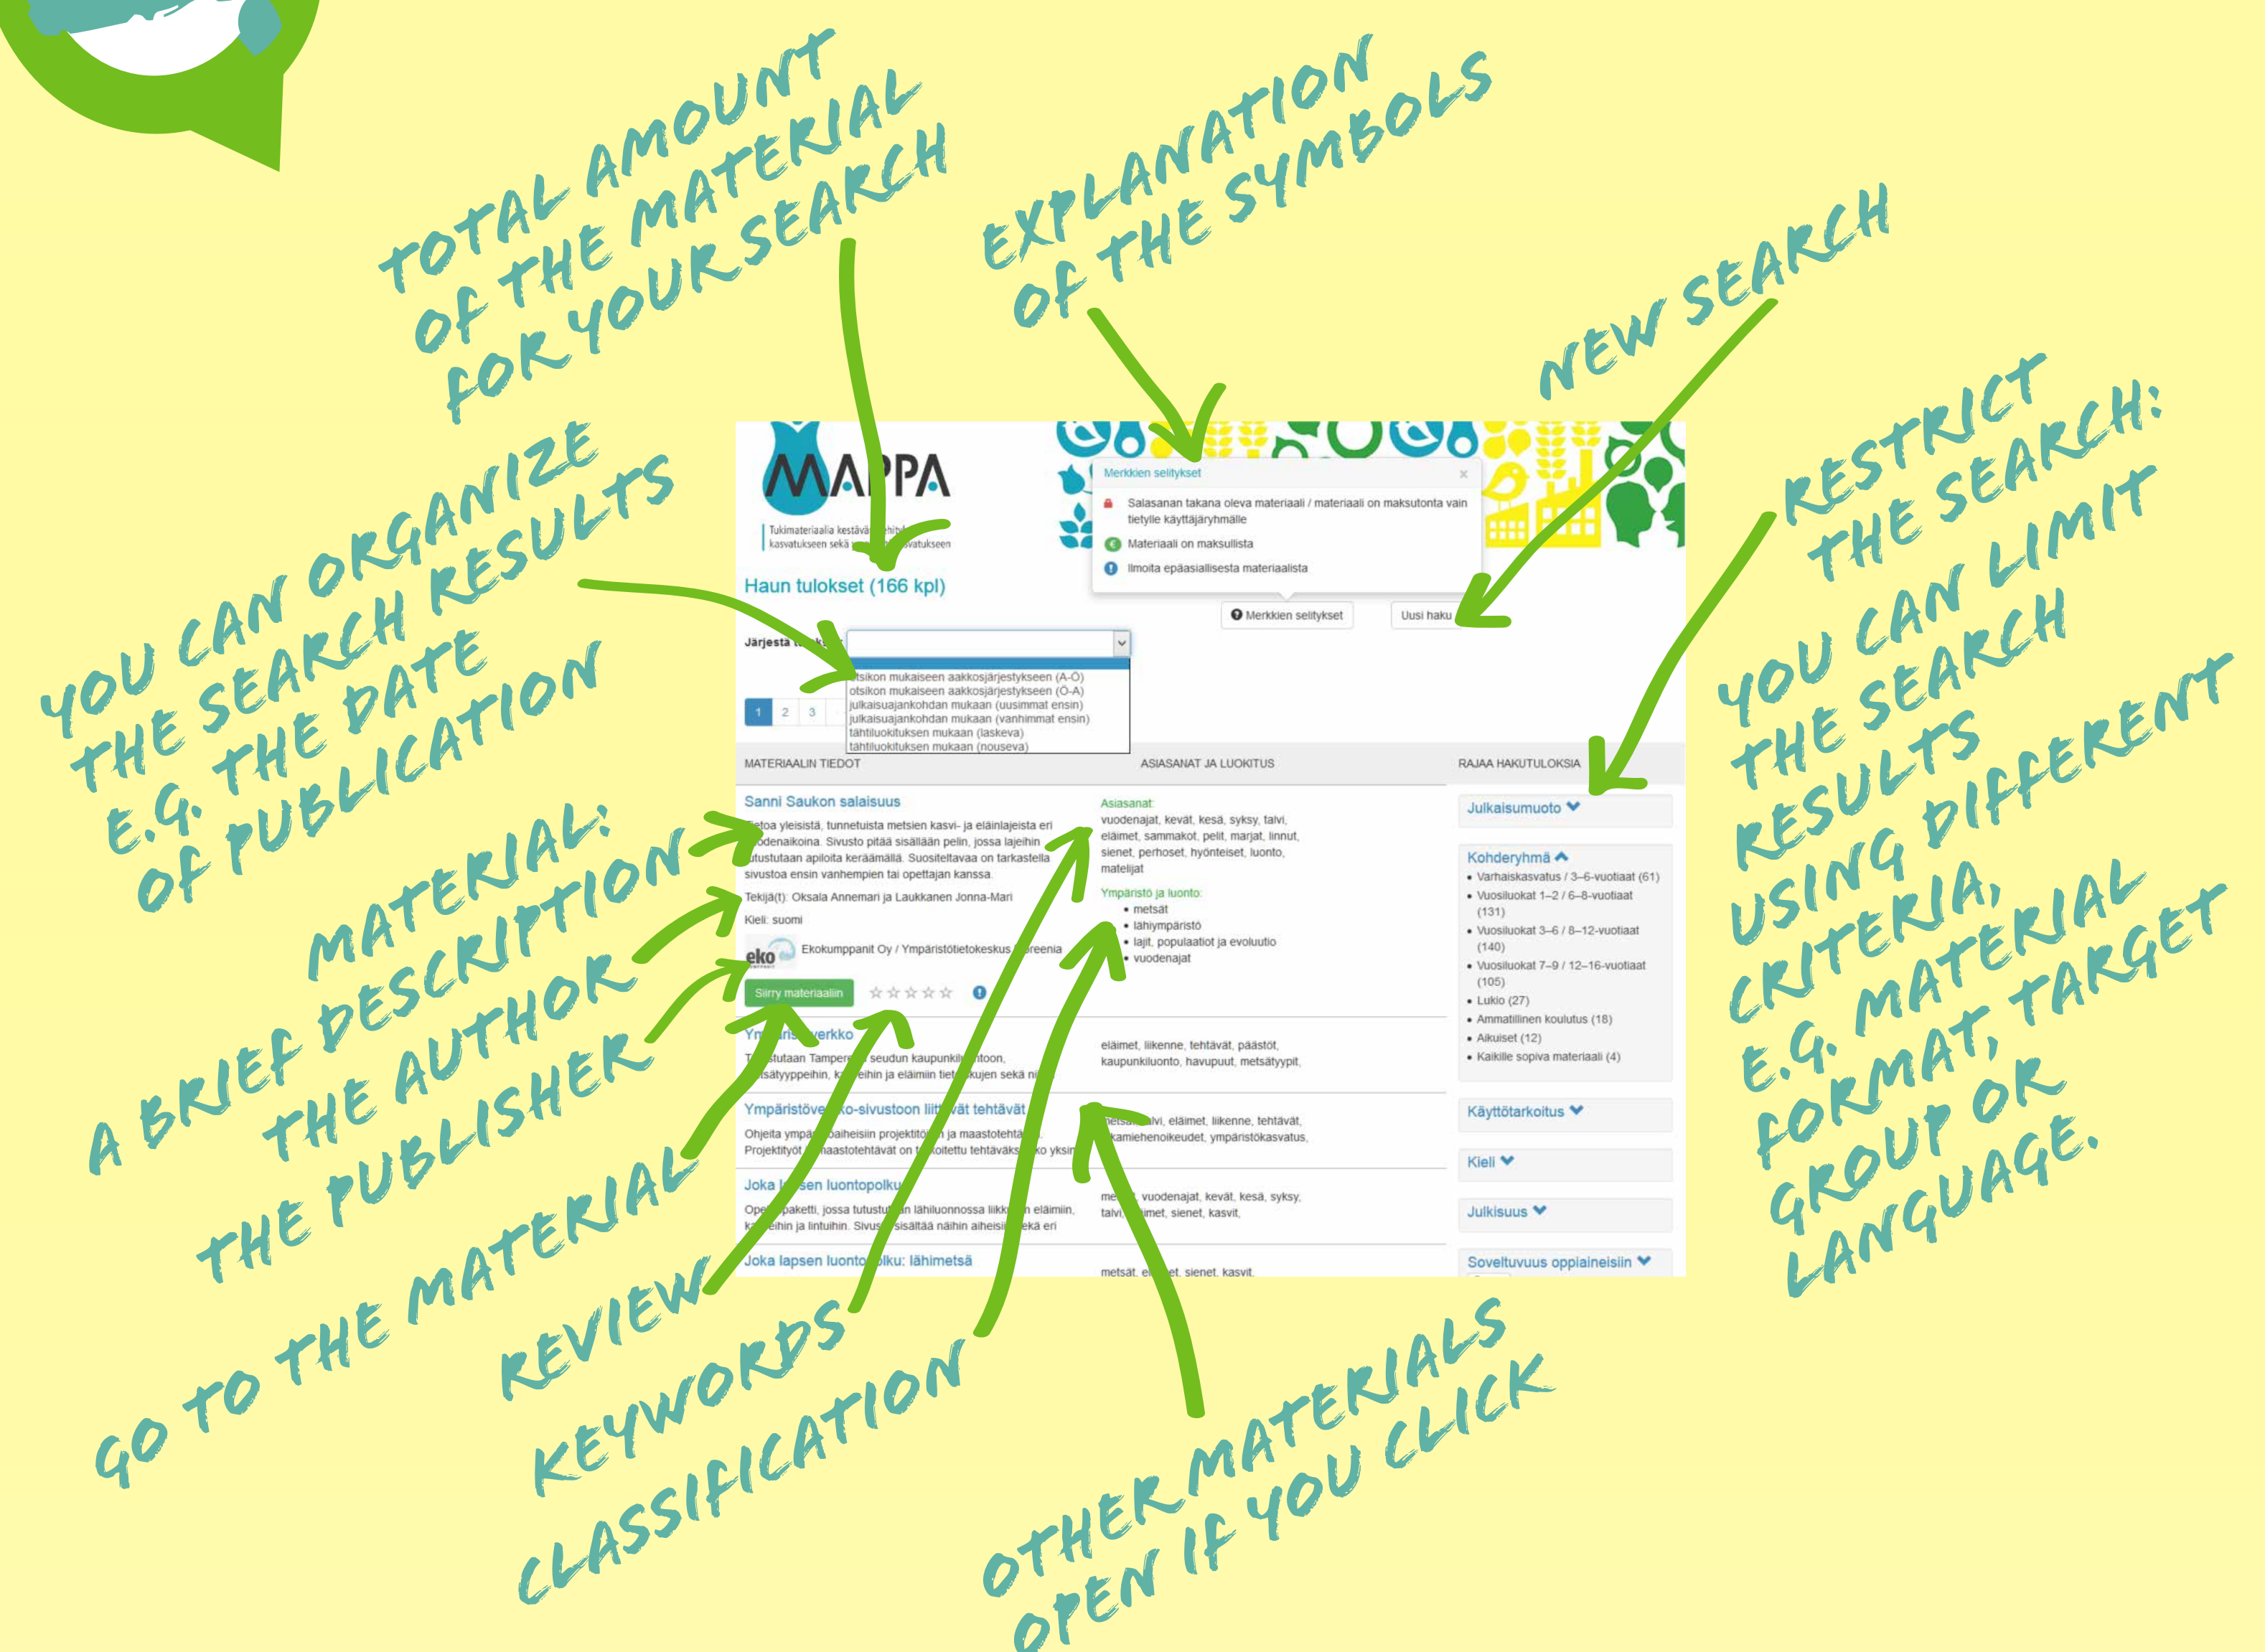

MAPP.A originated in the project, which involved various different associations and even public administration. The project is funded by the Ministry of the Environment and is managed by The Finnish Association of Nature and Environment Schools.
